

March 24, 2025

Dear valued client,

After more than two decades of providing analytical support to the cannabis industry, RPC is evolving its cannabis services to focus on specialized research and microbiology support. As a result, routine lot release tests, such as cannabinoids, terpenes, pesticides, and aflatoxins, will no longer be offered for samples received after March 28, 2025.

We will continue to offer all micro testing services, as well as nutritional analyses of cannabis edibles. Additionally, we will continue to offer trace cannabinoid analysis, genotyping work, custom engineering and automation solutions, extraction/formulation support, and other specialized research you may need.

We look forward to providing you with custom cannabis solutions, supported by our decades of industry experience.

Should you have any questions or need assistance with our ongoing services, please do not hesitate to contact us at 506.452.1212 or mmplab@rpc.ca.

Thank you for trusting RPC.

Dr. Diane Botelho
